From CEO's Desk

We are innovative and financially sound and because there are so many opportunities to grow within the organization. Many of the positions in management or in specialist areas are filled internally. Here you feel like part of a family and not so much an employee who has to perform his or her duties.

Mr. Sanjay Kodag
CEO Of Cupron Electric

About Cupron Electric

As a medium-sized, family-owned Electrical Contracting company, employing highly skilled people in Pune and Sangli, We're daily driven by our motto:
Energie In Best form - Energy in its best.

We are generalists and specialist, fascinated of innovation and Quality, with passion and innovative ideas we face new tasks and challenges everyday.

Cupron Electric

Quality,
Reliability
And
Timely Delivery Of Projects

Responsibility

Acting with people and the Environment in mind

Social responsibility and sustainable economies are the supporting pillars of our corporate strategy and entrepreneurial spirit. In addition, environmental protection and the safety and diversity of our employees is a permanent part of our culture.

All impacts of our activity on the environment are monitored and evaluated.

Our goal is to constantly reduce and burden on the environment in two different ways:

On the one hand, we give great importance to the efficient and careful use of resources in the providing solution to our clients, on the other hand, we also encourage our business partners to set the same standards.

Safety and Health of our Employees

At CUPRON, we are a family, and the health of our employees is a priority and a matter very close to our heart. CUPRON contributes to the well-being of our employees by providing regular trainings and safety briefings, a clean, tidy, healthy workplace atmosphere.

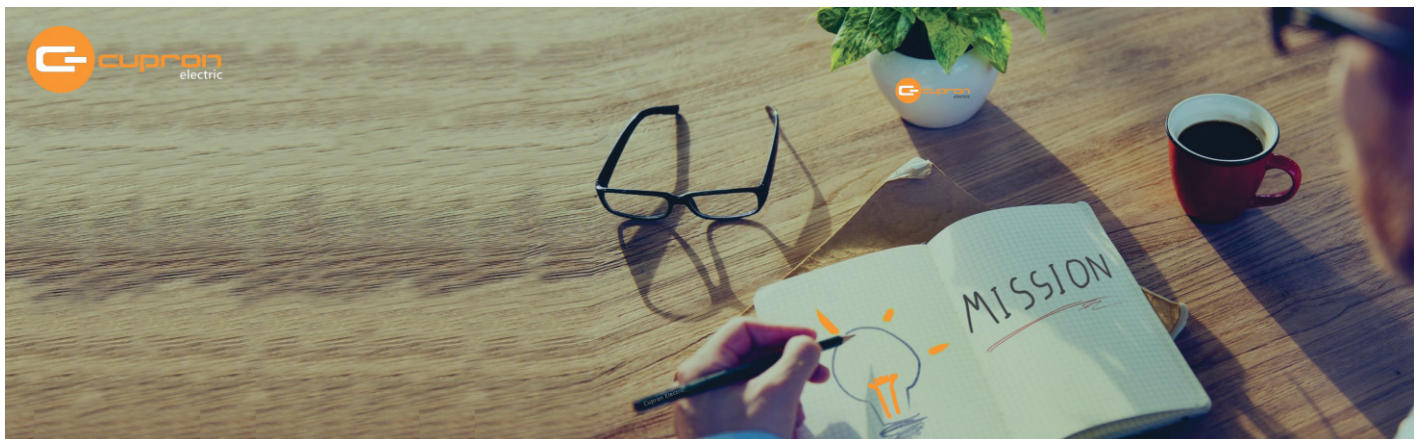

Vision

Cupron Electric is India's leading quality electrical solution provider in the high-end customer segment.

With our portfolio, market-driven price-performance ratio, product-related services such as net analysis, short time measurements and consulting as well as customized after-sales services, we're providing intelligent electrical solutions out of one hand.

Mission Statement

Our mission statement describes, who we are, which demands we have on our daily work and which targets we want to achieve on the long-term view.

| 2018 | 2019 | 2020 | 2021 | 2022 |
|---|---|---|--|----------------|

Avoiding “No” leaves more space for “Yes”

You have the right to perfection. How does Cupron Electric produce it? Systematically. By turning the customers requirement into our challengers, right from the get-go. whatever the task you may confront us with. You will never hear us say, “that can’t be done.” We call this process-oriented project management - utilizing our full potential from system analysis to system design. Processes that are standardized across all our staff people guarantee short development periods and result in the desired level of perfection.

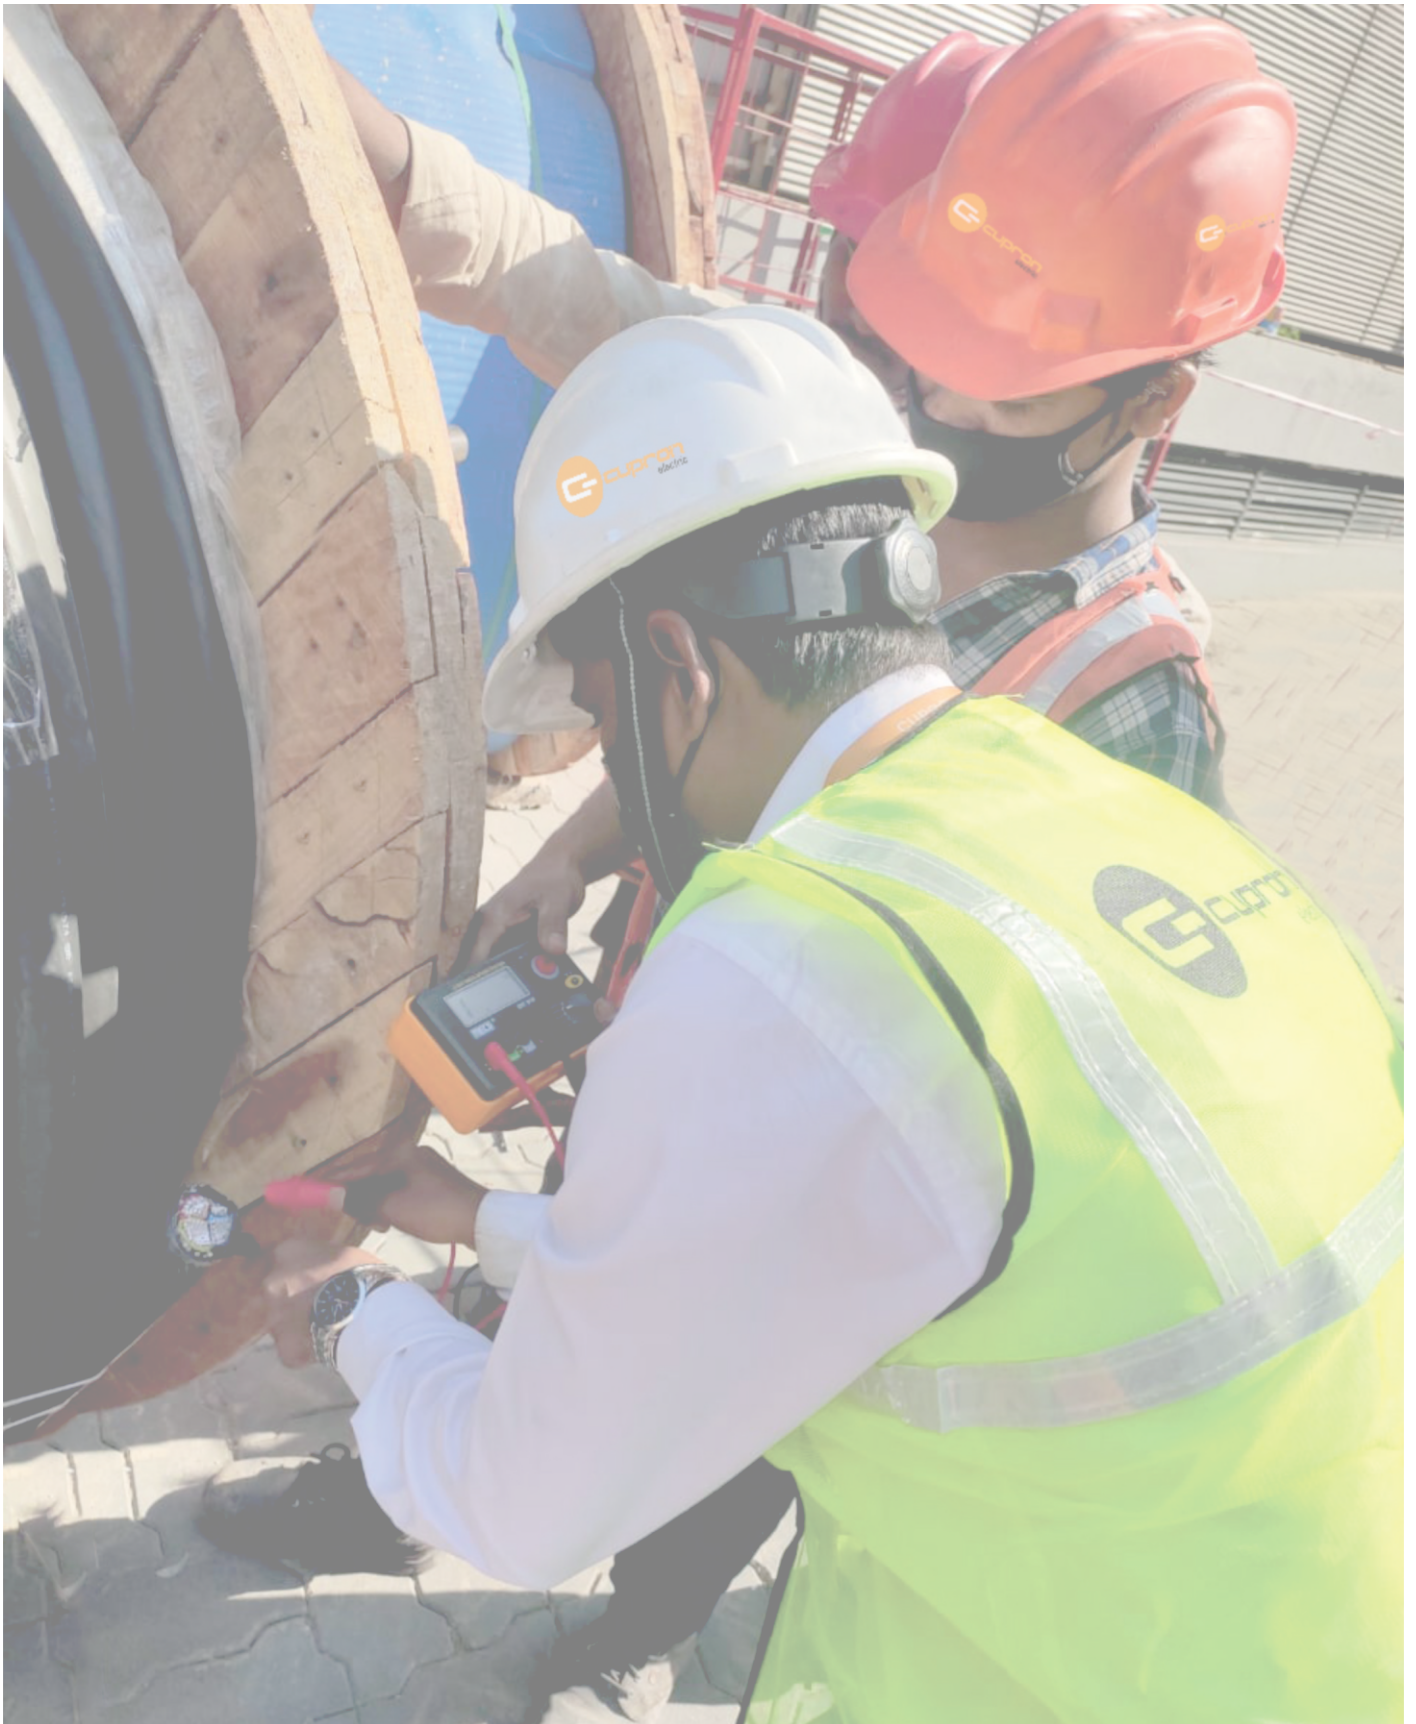

In short: Not only are we there to hear your grass grow. Cupron electric can also help make it just that little bit greener for you, our customers.
